Staff Policy Manual

This manual applies to all employees of Bright Smile Dental. It is reviewed every January by the practice manager. Where this manual and your employment contract differ, your contract applies.

Working hours

Full-time staff work 38 hours per week on a rota published two weeks in advance. Shift swaps must be agreed by both staff members and approved by the practice manager at least 48 hours before the shift.

Probation

New employees have a 90-day probation period. During probation the notice period on either side is one week. After probation, the notice period is four weeks for clinical staff and two weeks for administrative staff.

Leave

Annual leave

Full-time employees receive 20 days of paid annual leave per year plus public holidays. Leave requests must be submitted at least four weeks in advance for periods longer than three days. No more than two clinical staff may be on leave at the same time. Up to 5 unused days can be carried over to the next year.

Sick leave

Employees receive 10 days of paid sick leave per year. Call the practice manager before 7:30 AM if you cannot come in, so patients can be rescheduled. A doctor's note is required for absences longer than three consecutive days.

Parental leave

Employees with at least 12 months of service receive 16 weeks of paid parental leave, which can be taken any time in the first year after a birth or adoption.

Training and Conduct

Training budget

Each clinical employee has a continuing education budget of $1,500 per year and three paid study days. Administrative staff have a budget of $500 per year. Training must be approved by the practice manager before booking.

Uniform

Clinical staff are provided with five sets of scrubs per year. Closed-toe shoes are required in all clinical areas. Jewellery on the hands and wrists is not permitted during treatment, except a plain wedding band.

Infection control

All clinical staff must complete infection control refresher training every 12 months. Instruments are sterilised in the autoclave after every patient and each cycle is logged by the assistant who ran it.
